

TAXONOMYIC NOTE:
***PARAPLIOSACCOMYS WITTEORUM* (RODENTIA, GEOMYIDAE),**
A REPLACEMENT NAME FOR *PARAPLIOSACCOMYS WITTEI* MARTIN, 2008

James E. Martin

Museum of Geology, South Dakota School of Mines and Technology, Rapid City, SD 57701

J.E. Martin (2008) named a species of geomyid rodent, *Parapliosacomys wittei*. The trivial name was intended as a patronym for Beverly and Bernhard Witte. However, the suffix used for the trivial name was the genitive singular. Therefore, the appropriate genitive plural should be *-orum*, making the appropriate name *Parapliosacomys witteorum*.
